Full Stack Software Engineer specializing in dynamic and responsive software development using JavaScript, React, and Node.js. Adept at solving complex problems and applying strong analytical skills to develop innovative solutions.

Work Experience

Full Stack Software Engineer

Feb 2024 - Present

Balance LLC

- Developed a secure operating system for financial services using JavaScript, React, Node.js, AWS, Postgre-structured Supabase, and MongoDB, streamlining operations and enhancing performance.
- Achieved 100% client satisfaction for usability and 90% for functionality, with a strong focus on optimizing application performance.
- Led the development of a comprehensive form builder, optimizing the user experience by implementing key features, including form creation, sharing, role-based permissions, task management, and notifications.
- Collaborated closely with the team using agile methodologies, and managed tasks and workflows, participating in sprint planning and product backlog refinement sessions to ensure alignment with project requirements and priorities.
- Managed project versions and strengthened team collaboration by leveraging Git for efficient version control and workflow management.

Front End Software Engineer Internship - Team Lead

Oct 2023 - Mar 2024

Charm Life LLC

- Developed and launched a beauty community platform using HTML, CSS, Sass, JavaScript, React, React Query, and Zustand, enhancing user engagement and community interactions.
- Promoted to Team Leader in recognition of my quick learning and strong work ethic, successfully taking on expanded responsibilities in project management and team coordination.
- Deepened expertise in the React ecosystem, mastering state management, hooks, API integrations, and refining performance optimization skills throughout the software development lifecycle for a more reliable and efficient development process.
- Collaborated closely with all teams to ensure seamless integration, alignment with project requirements, and the successful implementation of integration tests.
- Guided the team in timely delivery of features, offering mentorship, streamlining project workflows, and engaging in the technical interview process.
- Participated in code reviews and provided constructive feedback in debugging sessions, contributing to a reduction in bug count.
