Full Stack Software Engineer with experience in web development, skilled in leveraging strong problem-solving and analytical abilities to drive innovation and deliver impactful, high-quality web applications.

## Work Experience

### Full Stack Software Engineer

Oct 2023 - Present

*Balance LLC*

- Developed a secure operating system for financial services using JavaScript, React, and Node.js to integrate server-side API requests, along with AWS, Supabase, and MongoDB, streamlining operations.
- Achieved 90% client satisfaction for usability and 80% for functionality by optimizing UI/UX and application performance.
- Led the development of a comprehensive, flexible form builder, optimizing the user experience by implementing key features, including form creation, sharing, role-based permissions, task management, and notifications.
- Collaborated with the team through agile development methodologies, utilizing Jira for task and workflow management. Engaged in sprint planning and backlog refinement to ensure alignment with project goals and priorities.
- Optimized workflow and improved team collaboration by implementing Git for efficient version control and project management.

### Front End Software Engineer Internship - Team Lead

Nov 2022 - Oct 2023

*Charm Life LLC*

- Developed and launched a beauty community platform using HTML, CSS, Sass, JavaScript, React, React Query, and Zustand, enhancing user engagement and community interactions.
- Promoted to Team Leader in recognition of my quick learning and strong work ethic, successfully taking on expanded responsibilities in project management and team coordination.
- Deepened expertise in the React ecosystem, mastering state management, hooks, API integrations, and refining performance optimization skills throughout the software development lifecycle for a more reliable and efficient development process.
- Collaborated closely with all teams to ensure seamless integration, alignment with project requirements, and the successful implementation of integration tests.
- Guided the team in timely delivery of features, offering mentorship, streamlining project workflows, and engaging in the technical interview process.
- Participated in code reviews and provided constructive feedback in debugging sessions, contributing to a reduction in bug count.

## Core Skills

HTML5, CSS3, Sass, Tailwind CSS, JavaScript, TypeScript, React.js, Node.js, Express.js, Git, REST APIs, Zustand, Tanstack Query, SQL, Postgres, Supabase, MongoDB

## Education

### Cyber University

Oct 2018 - Mar 2023

**Bachelor of Science** Computer Science
