## SUMMARY

Passionate Full Stack Software Developer with experience in web development, specializing in Front-end and Back-end technologies. Experienced in agile methodologies in web development and adept problem-solving. Eager to contribute dynamic skills and drive innovation in software development. Actively seeking opportunities to make meaningful contributions and foster innovation.

---

## SKILLS

Languages: HTML, CSS, Sass, Tailwind CSS, JavaScript, TypeScript, React.js, Node.js, Express.js, Postgres

Tools: Git, RESTful APIs, Zustand, Tanstack-Query, Supabase, MongoDB, Figma, Microsoft Visual Studio, AWS

---

## EXPERIENCE

### Full Stack Software Engineer

Balance LLC

February 2023 – Present

- Developed an Operating System tailored for Financial Services
- Implemented data storage and retrieval solutions, leveraging MongoDB's flexibility and Supabase's real-time capabilities.
- Led the development of a comprehensive Form Builder tool, enabling users to create forms with ease.
- Implemented user-friendly features for form creation, sharing functionalities, role-based permissions management and notifications.
- Collaborated closely with the team, participating in sprint plannings and product backlog refinement sessions to ensure alignment with project goals and priorities.
- Facilitated effective communication and coordination among team members, resulting in streamlined development processes and timely delivery of features.

### Front End Software Engineer Internship – Team Lead

Charm Life LLC

October 2023 – March 2024

- Developed a Beauty Platform Website.
- Implemented compelling user interfaces using HTML, CSS/Sass, JavaScript, React.js, React Query and Zustand.
- Collaborated closely with design and backend team and UI/UX team to ensure seamless integration and alignment with project goals.
- Conducted code reviews, provided mentorship, and contributed to the continuous improvement development processes.
- Explored the depths of React.js ecosystem, mastering state management, hooks, and honing skills in performance optimization for a more robust and efficient development experience.

### Web Developer

Information Society Service

July 2021 – October 2021

- Developed medical surveys.
- Designed user interfaces and web layout using HTML, CSS and JavaScript.
- Produced fully functional programs and writing clean codes.
- Collaborated with internal teams to identify system requirements.
- Produced code reviews and testing to ensure proper functioning of the application.

---

## EDUCATION

### Bachelor of Science, Computer Science

Cyber University • October 2018 – March 2023

---
