## SUMMARY

Passionate Full Stack Developer with expertise in building applications using JavaScript, React, Node.js. Eager to apply skills in driving innovation and contributing to impactful, high-quality software solutions.

## SKILLS

Languages | Frameworks: HTML, CSS, Sass, Tailwind CSS, JavaScript, TypeScript, React.js, Node.js, Express.js

Tools | Technologies: Git, RESTful APIs, Zustand, Tanstack Query, Postgres, Supabase, MongoDB, AWS

## EXPERIENCE

### Full Stack Software Engineer

Balance LLC

February 2024 - Present, Remote

- Developed a secure Operating System for Financial Services using JavaScript, React, Node.js, and AWS, streamlining operations and improving performance.
- Achieved 100% client satisfaction for usability and 90% for functionality.
- Implemented flexible data storage and real-time retrieval solutions using MongoDB and Supabase.
- Led the development of a comprehensive form builder, optimizing the user experience by implementing key features, including form creation, sharing, role-based permissions, task management, and notifications.
- Collaborated closely with the team in an agile environment, participating in sprint planning and product backlog refinement sessions to ensure alignment with project goals and priorities.
- Facilitated communication and coordination, streamlining development processes and ensuring timely feature delivery.

### Front End Software Engineer Internship - Team Lead

Charm Life LLC

October 2023 - March 2024, Remote

- Developed and launched a Beauty Community Platform using HTML, CSS, Sass, JavaScript, React.js, React Query and Zustand.
- Deepened expertise in the React ecosystem, mastering state management, hooks, API integrations and refining performance optimization skills for a more reliable and efficient development process.
- Collaborated closely with all teams to ensure seamless integration and alignment with project goals.
- Guided the team in timely delivery of features, offering mentorship, streamlining project workflows, and engaging in the technical interview process.
- Participated in code reviews and debugging sessions, contributing to a reduction in bug count.

### Web Developer

Information Society Service

July 2021 - October 2021, Tokyo, Japan

- Developed a comprehensive medical survey aimed at gathering insights from doctors to improve patient care.
- Optimized user interfaces with HTML, CSS, and JavaScript, driving user engagement and delivering a seamless, intuitive experience.
- Delivered fully functional software by writing clean, efficient, significantly reducing bugs and improving system reliability.
- Collaborated with internal teams to define and meet system requirements, accelerating project delivery and streamlining development workflows.
- Conducted code reviews and comprehensive testing, ensuring the application met quality standards.

## EDUCATION

### Bachelor of Science, Computer Science

Cyber University • October 2018 – March 2023
